Election/Restrictions

- This letter is responsive to the claims received on March 1, 2004.
 - The following is a requirement for restriction regarding a combination and subcombination. The applicant is required to elect from the group of restricted inventions.
1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 26-77 are drawn to image recognition system for distinguishing terms by comparing imaged documents with a collection/reference documents, classified in class 382 (Image Analysis), subclass 176 (Distinguishing text from other regions).
 - II. Claims 1-25 are drawn to a pictographic image recognition utilizing a specific technique of isomorphic keys, classified in class 382 (Image Analysis), subclass 181 (Pattern Recognition).

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant

case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination requires any type of image recognition comparison module, the subcombination requires a specific image recognition technique of utilizing isomorphic keys/geometric comparison. The subcombination has separate utility such as by itself, as a specific pattern recognition technique.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the

inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Park whose telephone number is (571) 270-1576. The examiner can normally be reached on M-F 10:30 - 20:00, (EST).
